

CRISTAL BLADE

THINGS TO KNOW

It's normal for you to feel a bit uncomfortable at the crotch area with both arms raised at the highest level.

If possible, get used to a torso measurement that is rather compact.

On your first trial, your *Cristal Blade* is new and fabrics are stiff. It will take a few jumps for it to soften and loosen up correctly.

What are the tall versions ??

Only the torso height, arms and legs have been slightly extended. Measurements on width and circumferences remain the same.

Please note :

The *Cristal Blade* is fitted with an inside pocket.

DESCRIPTION

Suitable for all skydiving activities and moderate wind-tunnel users, the *Cristal Blade* is a technical suit, very versatile, durable and comfortable.

Beginners or experienced flyers with thousand jumps... everybody love to fly the *Cristal Blade* !

Unisex model
